# Work Experience

## Machine Learning Researcher and Software Developer

Mar 2024 - Present

Maniar Technologies Pvt. Ltd.

As a research lead, I thrive in collaborative environments. I lead groundbreaking projects like DocumentorAI and TajMahal AI, wielding the power of GenAI and AI architectures. Together with my team, we push the frontiers of technology.

#### Consultant Software Development

Aug 2021 - Mar 2024

Maniar Technologies Pvt. Ltd.

During the early days of my career at ManiarTech, I explored new technologies and collaborated with cross-functional teams to implement innovative solutions, gaining foundational skills in tech and teamwork.

#### Projects

#### Documentor.AI — Python, GenAI, ML

Documentor.ai is an advanced AI-powered document generation and management system designed to assist businesses and individuals in creating and managing documents using Generative AI. I led research initiatives and developed proof-of-concepts (PoCs) for AI functionalities and taking it to production, facilitating the generation of comprehensive and precise documents with minimal user intervention.

### Taj Mahal AI — Python, GenAI, ML

TajMahal is an AI-powered static site generator designed to create performant and beautiful static sites using AI models. I played a key role in integrating AI capabilities within the TajMahal framework, enhancing the content generation process to enable users to effortlessly create beautiful, content-rich websites using simple prompts.

## Multiple Research and Proof of Concepts

Worked on multiple proof-of-concepts for AI-based projects, including Retrieval-Augmented Generation (RAG), agentic workflows, and advanced prompt engineering. I have developed React components, MongoDB migration tools, Next.js projects, and various other software solutions.

#### X – Expression Evaluator — Golang

Contributed to the development of an extensive suite of Excel function replicas for X, an expression evaluator in Golang, as part of Processious, a no-code/low-code process automation platform, to enhance its Business Rule Engine (BRE) for business automation.

#### SKILLS

Data ScienceLLMs, Machine Learning, RAG, Prompt EngineeringLanguagesPython, Golang, JavaScript, TypeScript, Dart, SQLFrameworksVue, Flask, ReactJS, NextJS, Flutter, TailwindCSS

Libraries NumPy, Pandas, Scikit-Learn, Matplotlib

DatabasesSQLite, VectorDB, RedisDevToolsDocker, Git, Ollama, VSCode

## **EDUCATION**

## BS in Data Science and Application

2022 - 2026

IIT Madaras — Chennai, Tamil Nadu

# Diploma in Computer Engineering

2019 - 2022

Thakur Polytechnic — Mumbai, Maharashtra

## ACHIEVEMENTS

#### Best Project in Modern Application Development 1 - IIT Madras

Certificate

Built Audify, a music streaming app, using Vue, Flask, SQLite3, Redis, Docker, Cronjobs.
